

## IRS PROGRAM

Sunday, January 23

Opening invited talk

**Richard Kayne** *Further Questions of Syntax*

|             |                      | Monday   | Tuesday  | Wednesday  | Thursday   | Friday   | Saturday   |
|-------------|----------------------|--|--|--|--|--|--|
|             |                      | January 24   | January 25   | January 26   | January 27   | January 28   | January 29   |
| 8:45-10:15  | PHONOLOGY            | D. Passino<br><i>Theoretical issues in syllabification: the case of consonant clusters</i>             | D. Passino<br><i>Theoretical issues in syllabification: the case of consonant clusters</i>             | L. Bafile<br><i>Stress placement and stress conditioned segmental phenomena</i>                  | L. Bafile<br><i>Stress placement and stress conditioned segmental phenomena</i>                  | G. Bocci<br><i>The interplay of prosody, syntax, and information structure</i>               | G. Bocci<br><i>The interplay of prosody, syntax, and information structure</i>               |
| 10:15-10:30 | BREAK                |  |  |  |  |  |  |
| 10:30-12:00 | SEMANTICS            | D. Delfitto<br><i>The meaning of 'structure': some issues in the cognitive foundations of language</i> | D. Delfitto<br><i>The meaning of 'structure': some issues in the cognitive foundations of language</i> | R. Zamparelli<br><i>Theories of genericity: quantification and exemplars</i>                     | R. Zamparelli<br><i>Theories of genericity: quantification and exemplars</i>                     | F. Arosio<br><i>Issues in Morphosyntac acquisition: Interference in complex structures</i>   | T. Guasti<br><i>Issues in semantic acquisition: Negating OR across languages</i>             |
| 12:00-13:30 | BREAK                |  |  |  |  |  |  |
| 13:30-15:00 | UNIVERSALIA          | A. Moro<br><i>The geometry of predication: Symmetry-breaking phenomena in syntax</i>                   | A. Moro<br><i>The geometry of predication: Symmetry-breaking phenomena in syntax</i>                   | A. Giorgi<br><i>An integrated model of Syntax, Prosody and Gestures</i>                          | A. Giorgi<br><i>An integrated model of Syntax, Prosody and Gestures</i>                          | R. Manzini<br><i>Theoretical issues in (adnominal) modification</i>                          | R. Manzini<br><i>Theoretical issues in (adnominal) modification</i>                          |
| 15:00-15:15 | BREAK                |  |  |  |  |  |  |
| 15:15-16:45 | DIACHRONIC VARIATION | C. Gianollo<br><i>Formal models of grammaticalization: negation</i>                                    | C. Gianollo<br><i>Formal models of grammaticalization: determiners</i>                                 | E. Sanfelici<br><i>On the strength of DO: case mismatch in free relative clauses</i>             | E. Sanfelici<br><i>On the strength of DO: case mismatch in free relative clauses</i>             | C. Poletto<br><i>Cognitive networks for diachronic change</i>                                | C. Poletto<br><i>Cognitive networks for diachronic change</i>                                |
| 16:45-17:00 | BREAK                |  |  |  |  |  |  |
| 17:00-18:30 | SYNCHRONIC VARIATION | C. Guardiano<br><i>An introduction to parametric comparison</i>  | C. Guardiano<br><i>An introduction to parametric comparison</i>  | A. Tomaselli<br><i>On the interaction between V2 and pro-drop: a crosslinguistic perspective</i> | A. Tomaselli<br><i>On the interaction between V2 and pro-drop: a crosslinguistic perspective</i> | S. Cruschina<br><i>Factors behind variation: Information structure and discourse context</i> | S. Cruschina<br><i>Factors behind variation: Information structure and discourse context</i> |
